Aim

I have accumulated various academic, psychological and spiritual experiences; for example, I have a Master of Arts in theatre and I practice kriya yoga daily. However, in the daily work at the theater and also in my role as an educator and entrepreneur I am, first and foremost, a practitioner. I have a long experience in managing people, creating a vision as well as developing the concept and realizing it. I like to use my knowledge to advance societal developments. And sometimes I have feeling that I do not exist: there is only a message about goodness, balance and the possibility of everything.
